

PRIYANKA DAS

Bangalore, Karnataka, India | +91 9957130845 | priya18bkj@gmail.com | [LinkedIn](#) | [GitHub](#)

EDUCATION

Jain (Deemed-to-be) University, Bangalore

2023 – 2027

B.Tech in Computer Science & Business Systems (CSBS) | CGPA: 8.8 / 10.0 | Final Year

Relevant Coursework: Data Structures & Algorithms, Operating Systems, DBMS, OOP, Web Development, Business Analysis

WORK EXPERIENCE

Full-Stack Web Development Intern | IIT Bhubaneswar Collaboration

Aug 2025 – Oct 2025 | Remote

- Built and tested full-stack web applications using React.js, Node.js and Express.js, covering the workflow from requirements through to deployment
- Designed database schemas and developed REST APIs for project workflows, handling debugging and issue fixes through to production

UI/UX Development Intern | MotionCut

Aug 2025 – Oct 2025 | Remote

- Translated design wireframes into responsive, functional frontend components using modern web standards
- Tested and refined layouts and interaction patterns across devices to improve usability

Full-Stack Web Development Trainee | InternsElite

Sep 2025 – Oct 2025 | Remote

- Worked on live web development projects covering both frontend and backend tasks under mentor guidance, gaining exposure to a structured development process
- Picked up better habits around version control, code review, and structuring a real project

Web Development & Design Intern | Oasis Infobyte

Jul 2025 – Aug 2025 | Remote

- Built and tested responsive web pages and functional UI components using HTML, CSS and JavaScript
- Received the Star Performer Award (AICTE-recognized) for outstanding contribution and project completion

Artificial Intelligence Intern | Krutanic Solutions (Accenture Program)

Jun 2025 – Aug 2025 | Remote

- Contributed to AI model development, data preprocessing, and deployment workflows across the project lifecycle
- Applied analytical and problem-solving skills to structured data tasks

LEADERSHIP & CAMPUS INVOLVEMENT

Tech & Marketing Lead | SECHO Club, CSBS Department, Jain University

- Led planning and on-ground execution of multiple department-level tech events, coordinating logistics, speakers and audience engagement with minimal supervision
- Hosted and anchored events end-to-end, managing stage delivery and audience coordination
- Drove outreach through cold email campaigns to speakers, sponsors and partner organizations, combining technical and marketing skills

KEY PROJECTS

MedPass — AI-Powered Digital Healthcare Passport (Project Lead)

- Led a team building a full-stack healthcare app that centralizes medical records with QR-based emergency access and role-based authentication
- Owned the project end to end — requirements, PostgreSQL schema design, coding, testing and feature delivery; the approach was filed as a patent

IIRIS — Intelligent Recognition & Independent Navigation System (Project Lead)

- Leading a Project-based Collaborative Learning initiative applying computer vision and AI for real-time navigation assistance
- Coordinating a cross-functional team through the full development cycle, from concept and design to a working prototype

Warehouse Object Detection & Tracking (YOLOv8 + ByteTrack)

- Built a real-time object detection and multi-object tracking system for warehouse automation, using YOLOv8 and ByteTrack
- Trained and evaluated a custom model (Precision, Recall, mAP) on GPU infrastructure, then integrated tracking on live video footage

Skylark Business Intelligence Agent

- Built an AI-powered BI dashboard with a FastAPI backend and Streamlit frontend, integrating the Monday.com API for live business data

- Designed the system architecture across data collection, analytics engine and REST API layers, then built the KPI and insights views

CrowdMind AI — Collaborative Brainstorming Platform

- Built a full-stack app for teams to generate, organize and refine ideas with AI assistance, including secure auth and a real-time analytics dashboard
- Connected a React frontend to an Express/MongoDB backend over REST APIs, with Gemini handling idea generation and summarization

EcoLens India — Personal Sustainability Tracker

- Built a full-stack carbon-tracking app for Indian users with a Supabase backend and Gemini AI for greenwashing detection and personalized tips
- Designed the dashboard, weekly scoring logic and a live AQI widget as core frontend features

AI Quiz Generator

- Built a full-stack quiz app with a React/Vite frontend and FastAPI backend generating topic- and difficulty-based MCQs via the Gemini API
- Implemented the question flow, scoring logic and answer review using core DSA structures (array, stack, queue, hashmap)

SKILLS

Core CS Fundamentals: Data Structures & Algorithms, Operating Systems, DBMS, OOP, SDLC

Languages: Python, JavaScript, SQL

Frameworks & Tools: React.js, Node.js, Express.js, REST APIs, Git/GitHub

Databases: PostgreSQL, MongoDB, MySQL

ACHIEVEMENTS & CERTIFICATIONS

- Star Performer Award — AICTE Oasis Infobyte Web Development Internship (nationally recognized program)
- Patent filed for an algae-based system for biofuel production and air purification (published, under review)
- Smart India Hackathon — Internal Round Participant, Jain University (24-hour team innovation challenge)
- Python for Data Science, AI & Development — IBM / Coursera (2025)
- AWS Cloud Assessment / Fundamentals — LearnTube (2025)
- Communicating with Confidence — LinkedIn Learning (2025)
